🔍 Search tools

PayPal Checkout

Give customers trusted, flexible options to pay for products and services on your site or app.
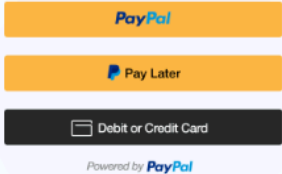

Get Started

5. At this point, you will have 2 options: (1) Simple, pre-programmed, copy paste solution. That only requires a front end, from my understanding, and (2) A more complex solution,

that is more custom and requires a backend server. We will go with (1)

< **Back**
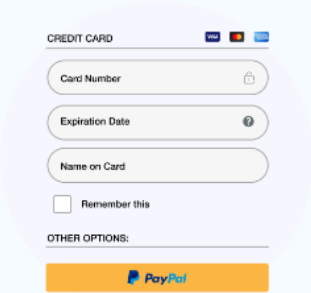

How do you want to set up PayPal Checkout?

Choose a ready-to-go option

- Add a payment button next to the products or services you're selling

Choose

Code it on your site

- Skilled coders can set up Checkout with our payments API
- Choose a standard setup or apply for custom payment fields
- Add optional chargeback and fraud protection

Choose

6. Then, now, you fill in the form on the left, in order to set your desired checkout.

7. First input is the pricing model

Customize the Smart Payment Button

Button details

✓ Fixed price

Single-select list

Variable price

0 / 127

8. Then description, price, and shipping fee

Item description

0 / 127

Item price	Currency
1	USD ⌄

Shipping fee	Tax rate %
0	0

Button style

Layout

	Vertical

	Horizontal

Shape

	Rectangle

	Pill

Color

	Gold		Blue

	Silver		White

|	Black

Button Text
PayPal

9.If you click the Button style drop down you will get access to a bunch of edits to edit the visuals for your PayPal buttons. I recommend to keep the layout vertical

10.Finally on the right Preview part, always pick desktop, then click copy code!
